

Eduardo Davila Zevallos

Full-Stack Developer

PHP · Laravel · MySQL · JavaScript

 620 09 40 23  edavilazevallos@gmail.com  github.com/EduardoDavilaZ  linkedin.com/in/edavilaz  eduardodavila.es

PROFESSIONAL OBJECTIVE

Junior Web Developer with experience in PHP, Laravel, JavaScript, and MySQL. I apply SOLID principles, design patterns, MVC architecture, and agile methodologies to develop scalable, maintainable web applications focused on process automation, API integration, and data analysis.

TECHNICAL STACK

Backend	PHP, Laravel, Composer, Eloquent ORM, REST APIs
Frontend	HTML5, CSS3, Bootstrap, JavaScript, TypeScript, Astro
Databases	MySQL, SQL Server
Architecture	MVC, SOLID, DRY and design patterns
Methodologies and tools	Scrum, Agile, Kanban, Git, GitHub, Jira

PROFESSIONAL EXPERIENCE

Professional internship - Junior Web Developer

THB Hotels | February 2026 - June 2026

- I developed internal web applications using Laravel, PHP, JavaScript, and MySQL.
- I implemented new features to optimize internal processes.
- I designed interfaces for internal analytics tools.
- I integrated APIs and process automation.
- I participated in an AI project for automated invoice analysis and metrics generation.

FEATURED PROJECTS

Environmental Module IA

Laravel · OpenAI API · JavaScript · MySQL · jQuery

Application for intelligent invoice analysis using AI, designed with a modular architecture based on reusable CRUD, dynamic form management, reusable component management, and automatic document processing.

Substitutions Management System

PHP · MVC · MySQL · Bootstrap · DataTables · PHPMailer · jQuery

Web application accessible from the institutional intranet for the management of teacher on-call duties and absences, automating the assignment of substitutes and centralizing communication between management and teachers.

OTA Analytics

Laravel · JavaScript (ES6) · jQuery · DataTables · HTML5 · CSS3 · AJAX

Development of an analytical dashboard for tracking bookings with Price Match and shopping cart abandonment. I implemented a dynamic interface with reactive filters, custom charts developed in JavaScript, asynchronous queries using AJAX, reusable components, client-side form validation, and report export with DataTables.

EDUCATION

Higher Technician in Web Application Development

Escuela Virgen de Guadalupe, Badajoz — 2024 - 2026

Comprehensive training in full-stack web development, including MVC architecture, relational databases, REST APIs, and collaborative workflows using Git and Scrum methodologies.

Professional Certificate: Creation and Publishing of Web Pages

I.E.S. Bárbara de Braganza, Badajoz — 2025 - 2026

Specialized training in responsive web design, accessibility standards, UX/UI optimization, and web site maintenance.

VOLUNTEERING

Spanish Red Cross | 2024 - Present

Active participation in preventive devices of the Relief and Emergency Unit as a lifeguard, collaborating in the initial care and resolution of incidents in multidisciplinary environments.
